Jacob Simmons

License: Valid 6/23

Insurance: Valid 3/23

- → Confirms employee identity
- → Tracks routes and schedules
- → Tracks time in/away from vehicle
- → Tracks cargo capacity
- → Secures sensitive areas
- → Real time alerts & historical reports

darcy   **GabrielHealth**

Knows who is operating the vehicle

Darcy facial recognition understands who is operating the vehicle and if they have a valid license and insurance

Tracks routes & schedules

Darcy knows where your vehicles are and how long they've been there

Tracks time in and away from vehicle

Darcy understands when the drivers seat is occupied and when the driver is away delivering packages

Tracks cargo capacity

Darcy in the cargo area can keep an eye on who is collecting packages and if any remain

Secures sensitive areas

Darcy integrates with access control systems to allow or deny access based on facial recognition, pass acceptance or any criteria.

Get real time alerts & historical reports

Get alerted immediately if any problems arise. Darcy provides daily, weekly or monthly reports to better understand visitors & behavior.

Darcy protects your fleet, drivers, and cargo and keeps you informed.

Darcy uses state of the art AI to ensure only approved employees are operating your fleet or company equipment and if they are compliant with your criteria.

Darcy is easy to set up and maintain. The small form factor (about 87mm x 160mm x 46mm) fits almost anywhere and features plug & play installation and remote update capability to ensure compliance even when regulations are constantly changing. Darcy data is secure and compliant with both HIPPA and GDPR.
